

Email Backup from Office 365

Turnkey corporate data backup and protection

Office 365

Why do you need backing up data from Office 365?

- When you use Office 365, you are in charge of not only controlling but also protecting your data.
- When you purchase the email backup from Office 365, you will prevent the risks of having users lose their access to Outlook email and calendars.

What are the risks?

- In case of an external cyber attack on your storage, data backup will help you save the data and keep your business up and running without paying for data recovery or return in case of cyber blackmailing.
- If your employees forget to renew the Office 365 license within their monthly or annual subscription, you will not have to deal with the problem of recovering access to the data in an inactive license.
- Backup also eliminates the risks of data loss due to human mistakes, network configuration errors, and power outages.

Common cases

When you need Office 365 backup copies

Accidental deletion
